

- Wanna talk for free?
- Wanna talk for free throughout the world?
- Wanna walk and talk with your Skype contacts?
- Wanna reduce to a minimum your mobile phone bills and increase the duration of your calls?
- All that is possible and a lot more...

MobiGater is a portal to free mobile calls all over the world. It provides a direct connection between your cell phone and the free Skype Internet Telephony.

**- more than Skype**

There is no need to sit in front of your PC to talk to your Skype contacts. MobiGater combines the free Internet calls with the freedom of the mobile communications.

**- better than VoIP**

The lowest single investment compared to all the other VoIP – based solutions. A universal solution, unlike the closed corporate VoIP systems. The quality and security of your calls is guaranteed by your mobile operator and the VoIP Internet giant Skype

**- for free with the whole world**

MobiGater combines the free Skype calls with the free business or family tariffs offered by mobile operators.

No need to carry around  
your PC ...

to make free internet calls  
on the move

Your solution is MobiGater  
Free mobile calls

0 cts/min  
worldwide

### What is MobiGater?

MobiGater is a device which transfers your Skype calls to your mobile phone without the use of SkypeOut credits. It connects to your cell phone via a SIM card placed inside it, and using a USB cable to your PC and Skype.

### Why using MobiGater?

Whether you are in front of your PC or not, you never miss a Skype call. MobiGater redirects them to your mobile phone.

You can dial any of your worldwide based Skype contacts at the cost of a SIM to SIM local call (The one in MobiGater and the one in your cell phone).

MobiGater lets you make low-cost calls from your mobile to your foreign partners' fixed and cell phones. The price you pay for a call equals the SIM to SIM one, in a mobile operator plan, plus the price of a SkypeOut call.

*MobiGater combines the best features of both communication tools - Skype and mobile phones. You have free Skype calls with GSM mobility and coverage.*

### All you need is:

- An extra SIM card for the MobiGater device. We suggest both cards to be in a business, family or other mobile operator plan so you can talk at no limits.
- A PC with a permanent Internet connection
- Free Skype registration.

## MobiGater Models

### MobiGater Plus

MobiGater Plus is a model, supporting one SIM card. The number of mobile numbers that can reach the MobiGater Plus and make Skype calls is unlimited. MobiGater Plus forwards the Skype calls to a single mobile number. The model is suitable for Skype users, who want to stay in touch with their Skype contacts even on the move, from their mobiles, for free, or at very low rates (depending on the mobile tariff plan of the SIM cards)

#### Main Features:

- incoming Skype calls to mobile phone
- outgoing Skype calls from different mobile phone numbers
- incoming SkypeIN calls to mobile phone
- outgoing SkypeOUT calls from different mobile phone numbers
- MobiGater configuration via web (3 months free subscription included, after an initial one-time registration in [www.mobigater.com](http://www.mobigater.com))
- Transfer call function to your mobile phone, during active Skype conversation

### MobiGater Pro

MobiGater Pro model supports a single SIM card and it forwards Skype calls to different mobiles (up to 5). MobiGater enables you to organize a company Skype central. It lets your consumers or partners get in touch with different departments and employees via IVR (Interactive Voice Response).

#### Main Features:

- incoming Skype calls to different mobile phones (Skype PBX function)
- outgoing Skype calls from different mobile phone numbers
- incoming SkypeIN calls to different mobile phones (Skype PBX function)
- outgoing SkypeOUT calls from different mobile phone numbers
